# MYSTIFY 9600 XT

AGP Graphics Card

Living in the perfect graphics world: the Mystify 9600 XT

The Mystify 9600 XT from TerraTec offers absolute top performance through high-end technology: a 500 MHz ATI chipset and 600 MHz clock speed (DDR) provide the kick which professional gamers desire. The state-of-the-art 0.13 micron production and simultaneous improvement in PCB insulation ensure increased speeds at a lower power consumption. Four pixel pipelines and two vortex shaders are responsible for the rapid 3D calculations — this puts state-of-the-art technology in your hands. TV, DVI and VGA outputs provide the perfect connections to the outside world.

### Get the most out of your card!

Up until now, tuning was something for specialists. However, thanks to dynamic overclocking, hardware amateurs too can now obtain the best possible performance from the Mystify 9600 XT — using easy-to-use software and, of course, without affecting the warranty in any way. You need not worry about your card: a chip-integrated diode is constantly in full control of the temperature. With the Mystify 9600 XT hi-tech graphics board, you can not only have beautiful displays for office applications, but also keep on playing games until the cows come home.

### MYSTIFY YOUR GAMES

Want to squeeze every last drop of performance from your hardware? Push the possibilities of your games to the limit? Then pay attention to this label: "Mystify Your Games". Experience perfectly tuned professional equipment, specially developed for the needs of demanding players.

## Technical data

- **Quad-Pipe Pixel Power**, Graphics environment with four independent rendering pipelines
- **High Performance 3D**, established graphics solution, which supports Microsoft® DirectX® 9.0 with AGP 4/8X
- **SMOOTHVISION™**, sharp and ultraclear textures without impinging on the image rate
- **FULLSTREAM™**, obtain a smoother and improved quality streaming content from the Internet
- **Monitor management using HYDRAVISION™**, giving control over the monitor display

## Memory interface

- 128 MB DDR (128 bit) @ 600 MHz

## Connections

- TV output
- DVI output
- VGA output

## Miscellaneous

- CATALYST driver

## System Requirements

- 300 watts power supply or higher recommended
- Intel Pentium 4/III/II/Celeron, AMD K6/Athlon/Athlon XP or compatible with AGP 4X (1.5v), 8X (0.8v) or Universal AGP 3.0 bus configuration (4X/8X).AGP 2X/4X universal slot
- 128 MB system memory
- Installation requires CD ROM drive

Art.No.: 073900  
EAN-Code: 4017273673905  
Warranty: 24 months
