# The professional system for keeping cool

Mystify H2O 2010: this is the name of a high-end system for all PC users who are not prepared to make any compromises in cooling processors and graphics boards. This powerful water-cooling system ensures that your hardware remains cool under the most extreme conditions. And this in situations where standard air cooling is simply not enough, such as with overclocking or similar tuning measures.

As you will see: you will hear nothing! Because the Mystify H2O 2010 not only does its work safely and reliably. Above all it does it in absolute silence. This means: annoying and disturbing fan noise is now a thing of the past. Once you have installed it, there is nothing more you need to do to keep it that way. Once everything is connected, the system is completely maintenance-free.

The Mystify H2O 2010 contains the professional technology of one of the leading developers in the area of PC cooling: innovatek. The complete set includes everything you need to install it in your PC. From the water coolers for processor and graphics board to the necessary tubing and connectors and the powerful Eheim pump.
