

TerraTec

**TerraCAM 2move**

For Desktop + Mobile Computing

Webcam and digital camera – TerraCAM 2move always enables the best performance - get “photo mobile”.

No matter if you're working with a computer, a notebook or if you are travelling, TerraCAM 2move always let's you do your best. The high quality sensor offers everything, you can dream of. In addition to a resolution of 640x480 it also offers a 24bit colour display. The integrated 8MB memory can save up to 100 of your best photos.

The extensive software package allows an instant use of the TerraCAM 2move, without any difficult installation procedures. Take pictures of the ones you love and send them via E-mail to your friends and family. Record videos or meet your business partners face to face in video conferences. The current software allows you to install the camera, wherever you want to.

#### **Photo Express 4.0SE: Say "Cheese"**

Photo Express allows you to polish up your photos. Mix various photos, let them look like oil paintings or drawings and add balloons, clouds or snow. You may also create your own greeting cards and photo calendars. Send your pictures via E-mail or let Photo Express create a photo site for your homepage on the Internet.

#### **Cool 360: View all around**

Take photos of the most beautiful places and use your computer to look at them in a 360° view. Let the pictures pass by like on a merry-go round. Look at a place far away and let it pass your view as if you were there – without using a video camera.

#### **Photo Explorer 6.0SE: Don't loose track**

Look at the photos, taken after a walk out in the forest, on your computer. You may also load the pictures, you have taken of your friends, on your homepage for everyone to see. Create albums of your best photos or a slide show for your relatives and friends. There is so much, you can do!

#### **Net Meeting: Eye for eye**

NetMeeting – The mother of video conferences is also included in the TerraCAM 2move package. With a modem or an ISDN card you can use this software to participate in video conferences all over the world or set up a convenient picture phone connection. This is also valid for your internal network.
