

GRABSTER AV300MX

USB-BOX for digitalisation of VHS Video with analogue signal output

- USB 2.0 Video Converter for PC and Notebook
- Analogue signal inputs and outputs: Composite, S-Video, Stereo Audio
- Powered via USB bus (no additional power supply needed)
- Incl. all cables needed
- MAGIX Video Editing Software

With the GRABSTER AV 300 MX you can convert analogue VHS video-records into a digital format on your computer. Simply you can connect the GRABSTER AV 300 MX with your computer and your VHS video recorder. For saving and editing of the video data the provided software MAGIX Video easy TERRATEC Edition is relevant.

GRABSTER AV 300 MX and MAGIX Video easy are the perfect team for burning VCDs, SVCDs and DVDs with just a few clicks of the mouse. Copy your videos via USB onto your laptop or computer. Needless to say, GRABSTER AV 300 MX also supports all analog video sources such as camcorders and set-top boxes. Use video and slide show editing functions as well as the fully customizable selection menus to burn your valuable movie memories forever to CD and DVD at top quality. Also, it's quick and easy.

Copy

No matter what device or medium you want to import data from - from video recorders to satellite receivers, camcorders, and even DVD players - all devices with analog video outputs can be connected with a composite or S-video cable.

Edit

Edit out the commercials or other unwanted parts from your recordings. Add slide shows and videos. Pep up your creation with a wide range of transition effects and set the right mood by adding music and live commentary. Finally, select a menu template or create an individualized animated menu. Now GRABSTER AV 300 MX will burn your CD or DVD.

Playback

In no time at all, you have produced a professional DVD that is well worth watching—whether on your laptop or on your television. Surprise your friends with a DVD you created yourself! With just one click, you can make as many copies as you like.
